

Health Care Inclusive Procurement Network (HCIPN)

This directory supports HASC member hospitals and health care systems in enhancing supplier diversity and inclusive procurement initiatives. The HCIPN is designed to help identify contract-ready, experienced, diverse vendors who meet the AB 962 and AB 1392 classifications.

PLEASE READ FIRST	
Introduction	This reference tool identifies potential small and diverse-owned suppliers and vendors. Inclusion on this list does not imply endorsement or recommendation; it is a starting point for further evaluation.
Purpose	This list's primary purpose is to streamline the supplier identification process. It is designed to assist users in finding potential partners based on their specific needs.
Due Diligence	Users are reminded that inclusion on the supplier list does not substitute for thorough due diligence. Organizations must conduct their assessments, considering capacity, reputation, financial stability, and compatibility with specific requirements.
Verification	Users are encouraged to verify the information provided on the list before engaging with any supplier. Contact details, capabilities, and other relevant information should be confirmed independently.
Updating Information	The supplier list will be periodically updated, but users must verify the latest information. Users are encouraged to report any inaccuracies or changes in supplier status.
Confidentiality	Users are expected to treat the information on the supplier list with confidentiality. Sharing the list or sensitive supplier information without proper authorization is strictly prohibited.
Feedback	Users are invited to provide feedback on the list's usefulness and suggest improvements. Continuous improvement is key to enhancing the effectiveness of the supplier identification process.
Disclaimer	The organization providing this list disclaims any liability for decisions based on the information contained herein. Users are responsible for their actions and decisions when engaging with suppliers.
